

Years of rain penetration through exterior brick walls of Dnipro caused extensive damage to ornate plaster interior walls

We did emergency masonry repair, with help from a contractor from Rochester, plus our own labor. We also erected our own scaffold and began emergency repair to the ornate interior plaster work in the Dnipro Velika Zalya (Banquet Hall).

Even during emergency construction, we have struggled to sponsor Ukrainian cultural events, like a Vyshyvanka Zabava. To help fund the emergency repairs, we've been renting the Banquet Hall for Weddings, Birthdays, and Baptism parties.
